Course Description

This conference will present a 16-hour lecture program designed to provide anesthesia practitioners with a review and update on the latest developments in the field of anesthesia. By attending this course, participants should be able to:

- Describe and define issues concerning Wet Taps
- Assessment and benefits of IO and its impact on anesthesia
- Define proper documentation of your anesthesia record
- Participate in a mock malpractice trial defending the anesthesia record
- Identify the characteristics, procedures and care of the elderly patient
- Discuss and define the guidelines for safe injections in a clinical setting
- Discuss and review the compliance standards of AANA, CDC and OSHA for safe injections
- Discuss causes and concerns associated with stress in the clinical setting
- Review and discuss anesthesia concerns with body piercings
- Discuss and understand how to decompress the Type A personality in a clinical setting
- Discuss palliative care and its impact on anesthesia
- Review the surgical outcomes with robotic surgery
- Review airways management for emergency pediatrics
- Review the implications with anesthesia for the septic patient
